It Is a Real Economy to Buy a Good Refrigerator

If you have ever had experience with a cheap Refrigerator, you know it is a costly experiment to have one in your home: the ice bills are large and in addition the food is not preserved as well. In the long run it is more costly than to buy a good Refrigerator in the first place. All our models were selected after the most careful examination, because of their perfectly insulated walls and circulation of cool dry air to every part of the food chamber. Your saving of ice alone in one season will be sufficient to almost pay for one of our Refrigerators which are priced on convenient credit terms at \$9.90 up.
